

## Designated Professor

**Masaru  
SAGIYAMA**

One of the defining challenges will be to create a new society and technologies which harmonize with global environment and human beings. I'd like to contribute to realizing the new paradigm through industry-academia collaboration.

## Visiting Professor

**Takeshi  
BESSHO**

I research an advanced seed technology at the university related to the Surface treatment, and manufactures it. I will act as mediator between university and industry.

## Visiting Professor

**Haruo  
UYAMA**

Here the place where you can study and learn "Functional Film Technology". You can develop epoch-making and innovate Film Process Technologies in this Lab.

## Visiting Professor

**Yoshiyuki  
UESHIMA**

There is a long history over 5000 years of steel production technology, but it is not perfect yet. In fact, only 20% of intrinsic properties of iron have been grasped and put to practical use. We will challenge to reveal the residual 80%, that is, huge untouched frontiers at various stages of steel production process. Every trial will surely make a road to frontiers, I believe!

## Visiting Professor

**Hiroyasu  
KOJIMA**

State of the art thin film processes, advanced materials by industry university cooperation from Nagoya.

## Visiting Associate Professors

**Satoshi  
TAKATA**

Our aim is to develop conventional manufacturing process collaborated with university and industry via application of interface science.
